

Bland County Solid Waste Collection Notice

The County would like to ask for our residents to refrain from placing any type of Lithium or Lead Acid Batteries out or with your Trash Collection. Lithium Batteries can overheat, catch fire, and even explode. We recently had an issue in one of the trucks, but the Employees were able take control of the problem before it became a major issue.

Please contact 276-688-4622 if you have any Lithium or Lead Acid Batteries that need disposed of.

Thank you for helping to keep our Collection Personnel safe!
